

Display Energy Certificate Road shows

You are invited to attend a TEAM regional Display Energy Certificate (DEC) Road show where we will be presenting our solution for producing the DEC.

At this event we will explain in detail the EU Energy Performance of Buildings Directive.

We will demonstrate how you can use our new *Sigma* software module to produce your own DEC.

We will also describe how our accredited Energy Assessors will collate details of your building characteristics and energy consumption data, produce the DEC and register it on the DCLG (Department of Communities and Local Government) database.
